

Caldera Medical Donates \$300,000 of Product as Part of their Humanitarian Aid Program

Caldera Medical announces the continuation of their Humanitarian Aid Program following record-breaking Q2 sales performance.

AGOURA HILLS, CA, July 14, 2011 – Caldera Medical, Inc., a leading manufacturer of surgical implants for the Gynecology, Urology, and Urogynecology markets, announced today the continuation of their Humanitarian Aid Program which was initiated in May of 2010. Since its inception, Caldera Medical has donated nearly \$300,000 worth of product to surgeons throughout the U.S. in support of their Humanitarian Aid efforts in third world countries.

Caldera Medical donated their Ascend[®] Pelvic Floor Repair System for the treatment of Pelvic Organ Prolapse, Desara[®] Sling System for Stress Urinary Incontinence, as well as their full line of reusable introducers to surgeons traveling abroad on humanitarian aid missions.

Desara Sling System's unique design offers excellent mesh integrity and is the only system to offer surgeons a complete choice of surgical techniques to meet their needs in every case. Ascend Pelvic Floor Repair System delivers complete apical support for the anterior and posterior compartments. Both of these products are designed to work with the full suite of Caldera Medical introducers, utilizing the proprietary Universal Connection System, which allows surgeons the flexibility to choose any surgical approach.

"Caldera Medical will continue to support humanitarian aid as a large number of women in poverty stricken countries suffer from incontinence and prolapse. By providing our implants we can help drastically improve a woman's quality of life. As surgeons donate their valuable time for these aid efforts, the small gesture of donating our products is the least we can do to champion this worthy cause," commented Bryon L. Merade, Chairman and CEO of Caldera Medical.

Moeen Abu-Sitta, M.D., FACOG, FACS, director of the Buffalo General Hospital Women's Center for Bladder & Pelvic Health, received donated product for his 10 day trip to the Gaza Strip where he worked at Al Awda Hospital, located in the Jabalia Refugee Camp-the largest refugee camp in the Gaza Strip with more than 100,000 people. "The trip was very productive. I was able to perform 10 procedures in the short time I was there and trained 16 urologists and gynecologists at Al Awda Hospital. Your donations made a huge difference in the lives of many women. Thank you again for your help" said Dr. Abu-Sitta. "Urinary incontinence and pelvic organ prolapse are serious medical problems in women all over the world. Women in developing countries generally have more advanced conditions due to the higher number of children born to each woman, resulting in more pelvic trauma. The urinary incontinence and pelvic organ prolapse that often results from childbirth trauma leads to social isolation and feelings of shame. These conditions can be treated surgically very successfully, vastly improving the quality of life."

Caldera also announced Q2 2011 results, posting 59% revenue growth compared to the same period of the prior year. In addition, Caldera Medical realized growth of 50% for the first half of 2011 compared to the first half of 2010. Q2 proved to be the best quarter in the 9 year history of Caldera Medical.

Surgeons can apply to receive free product to support their humanitarian aid efforts by contacting Sandra Muhlfeld, Director of Marketing, at smuhlfeld@calderamedical.com.
